

Webinar on Standard Codes for Dielectric Tests on High Voltage Equipment

15th March 2024
(Friday)
2:00 PM to 5:00 PM (IST)

Organised by
High Voltage Division
Central Power Research Institute
Bengaluru
Website: www.cpri.res.in

Content

- Basics of HV Test Techniques
- Standard test codes for HV Insulators Switchgear
- Standard test codes for HV Instrument Transformers and Power Transformers
- Dielectric Testing of Power Transformers

Co-ordinators

- Mr. KA Aravind, Joint Director (aravind@cpri.in, Mob: 9440354295)
- Mr. Dharmesh Y, Engg. Officer (dharmesh@cpri.in, Mob: 6362037114)
- Mr. G Pandian, Joint Director & HOD (gpandian@cpri.in, Mob: 9741836174)

About CPRI:

Central Power Research Institute (CPRI) set up in 1960 by the Government of India, functions as a National organization for applied research in power sector and also serves as an independent laboratory for testing and certification of power equipment. CPRI is a member Short-circuit Testing Liaison (STL) and one of the largest independent third party Testing & Certification service provider of the world in the field of Electrical Equipment. CPRI also provides consultancy services on various facets of power sector. CPRI has expertise in the area of simulation, diagnostics, system analysis and testing. CPRI laboratories have modern equipment needed for power system simulation, smart energy meter testing, short circuit testing, high voltage testing, diagnostics of equipment, inverter testing, LED testing, Solar PV module testing, materials engineering, Seismic qualification etc.

About the program:

The High Voltage Division has facilities for dielectric tests on high voltage equipment and has rich experience of more than 60 years in the field of High Voltage Testing. This webinar disseminates the knowledge on the standard codes and test methods for dielectric testing of high voltage equipment.
